

## Customer Testimonial

### Almatek LE1233 General Purpose Lubricant

#### Company Profile:

Pilehire is dedicated piling & drilling hire company, specialising in manufacturing & hiring heavy duty to light industrial piling and drilling equipment.

Pilehire currently has 500 plus piling & drilling attachments that are supplied to various clients throughout New Zealand.

#### Application:

Almatek LE1233 is used on all pins, bushes, bearings & slides on the attachments for excavators from 1 to 45 tonnes.

#### Challenge:

When using a commercial brand lubricant, the company experienced several challenges with its equipment, including:

- High rate of wear
- Short lubrication intervals
- Operating in wet conditions
- Creaking from pins & bushes
- High load & vibration

#### LE Solution:

Chris Unsworth recommended Almatek LE1233, a highly versatile general purpose lubricant for friction and anti-friction bearings, chassis points and other grease related applications. It is specially formulated from carefully selected stocks and blended with premium thickeners to achieve long life and excellent performance. It provides outstanding rust & oxidation resistance and will not wash out or pound out.

Almatek LE1233 contains Almasol®, LE's proprietary solid wear-reducing additive, which is able to withstand extremely heavy loads, chemical attack & temperatures up to 1,038°C (1,900°F).

It also contains Quinplex®, LE's proprietary impact-resistant additive, which contributes to outstanding water resistance, tackiness and enhanced mechanical stability, and helps to form a barrier against corrosion.

## Customer Testimonial

### Results:

After switching to Almatek LE1233, Pilehire has experienced longer lubrication intervals, lower grease consumption and less wear on the pins & bushes.

### Customer Comments:

Dave Broughton, Equipment manager states that it is a common occurrence that customers do not grease the equipment whilst on hire resulting in expensive repairs and downtime, since using Almatek LE1233 less equipment is returned damaged as the Almatek LE1233 stays in place.

### Other products used:

Xport™ 19.2 volt battery powered Clear Grease Gun

Multilec® Industrial Oil LE6805 – Vibrator

Attachments

Flexbimec 50:1 pneumatic grease pump and 20Kg pail trolley
